

Agentic Architecture - Every Agent & Role

Phase 1 runs 5 specialist agents in PARALLEL, then Merger. Phase 2 uses a different agent set for mapping only. Phase 3 uses implementation subagents. Reports/visuals out of scope.

PBIX to Looker - Agentic Architecture (all agents named)

OUT: phase3_agents/01 + warehouse_sql/

L. LookML Builder

Role: views, measures

joins, explore model

TODO for complex DAX

OUT: phase3/views + models/

C. Coverage / Docs

Role: accountability
migration summary
developer guide

PBIX to Looker - Agentic Architecture (all agents named)

DONE = accountable objects

IMPLEMENTED / PARTIAL / TODO / SKIP

KPI parity = separate validation

NOT forced conversion

Never silently drop a PBIX object

Phase 1 - six agents (detail)

Agent	Role	Output
1 Schema	Extract every table/column including LocalDateTable_* / DataTableTempl	inventory/01_tables_columns.json
2 Relationships	Extract every relationship (cardinality, cross-filter, active)	inventory/03_relationships.json
3 DAX	Extract all measures, calc columns, calc tables with FULL expressions	inventory/02_dax_objects.json
4 Power Query M	Extract verbatim M; write one .m file per query	04_power_query_m.json + 04_m_raw/
5 TM Extras	Partitions, hierarchies, RLS/OLS, annotations, auto dates (empty=[])	inventory/05_tmschema_extras.json
6 Merger	Merge 1-5; ACTION_MATRIX; COMPLETENESS_GATE PASS/FAIL	OBJECT_INVENTORY + GATE

Phase 2 - four agents (detail)

Agent	Role	Output
A Tables/Columns	Map tables->LookML views; columns->dimensions	phase2_agents/01_*.md
B DAX Mapping	Map measures/calc; mark COMPLEX (SPLY, ALL, MAX period)	phase2_agents/02_*.md
C Rel/M/TM	Map joins, M destinations, RLS, hierarchies, auto dates	phase2_agents/03_*.md
D Mapping Merger	Build LOOKML_MAPPING_ASSESSMENT.md + PDF; merge gate	LOOKML_MAPPING_ASSESSMENT.*

Phase 3 - three subagents (detail)

Agent	Role	Output
W Warehouse Gaps	Only capture M/DAX gaps; base tables assumed present	phase3_agents/01 + warehouse_sql/
L LookML Builder	Implement views, measures, joins; TODO complex DAX	phase3/views + models/
C Coverage/Docs	IMPLEMENTATION_COVERAGE + guides + migration summary	phase3/* guides

Flow summary

```
PBIX
-> Orchestrator
  -> Phase1: Agents 1-5 PARALLEL -> Agent 6 Merger -> GATE PASS
  -> Phase2: Agents A-C PARALLEL -> Agent D Merger -> MAPPING PASS
```

PBIX to Looker - Agentic Architecture (all agents named)

```
-> Phase3: Agents W + L + C -> phase3/ LookML + gap SQL + docs  
-> KPI Parity (manual / later) - NOT automatic
```
